diag in New Tork, Brooklyn, and Williamsburg, was half yesterday afterseen, at No. 274 Grand street, New York pursuant to the call of a committee. It was very respectably attended. Mr. Small acted as secretary to the meeting, as well as interpreter for the German members present. The meeting cannot be properly ranked among the trade "strikes," as it was convened more for the purpose of ascortaining the exact rate of wages (which is very variable) now given, and devising some means of producing a fair and compensating average.

The chairman explained the objects for which they had ascembled—the fair and proper equalization of wages, both for piece and day work and the necessity which existed for the formation of a "Trade Protective Union." Recolutions embody ing these sentiments were put and unanimently adopted—it was moved that each member joining the proposed Union pay the sum of one dollar permonth, for three months into the funds, and twenty-five cents a month after that time. Mr. Thurston recommended a postponement of this resolution until after the position of the mrn with regard to wages was more fully understood. The resolution was afterwards carried.

The fourth resolution was afterwards carried.

The fourth resolution was afterwards carried.

The fourth resolution as a fundamental carried in consequence of the unprecedented rise in the price of provisions, rents, and necessaries, an advance of fifteen per cent had the stable for manufactured articles; it was only thirty per cent, and if fifteen per cent had man in the price for wages it would not be in the

per cent be demanded.

Mr. Pitt would cail he attention of the meeting to the import duties now paid upon manufactured articles; it was only thirty per cent, and if fifteen per cent had been invariably added for wages it would not be in the power of the bose se to have a home manufacture at all. After a good deal of discussion, in which Mr. Hinds, Mr. Nood, Mr. Thurston and the Chairman took part, a committee was appointed to compare the list of prices now paid in each shop represented, and if the highest were fair to each shop represented, and if the highest were fair to each shop fair prices were paid, but that Mr. Hodgett's scale was much lower Meesra. Pitt, Ganne, Higs, Leonard, Egleton, Small, and Michel, were appointed a committee for the purpose of arganging the list of prices now paid and report what increase, if any, is needed. Committee to meet at 10 o'clock this morning.

When arrested by the officer-geverni pawn tickets were found on his person, which gave the officer power to recover the majority of the stolen property. Improvements in the Country—The Transit Company—
Wrecks of their Steamers—A Railroad—Forgeries.

From San Juan I wrote you of the influx of Americans, but I was not prepared to see them settling on the banks of the river, where I was surprised to find several Yankee establishments—frame houses, carpets, mirrors, and other evidences of civilization. There are no less than four extensive clearings, with crops in the ground, and in evident prosperity. At the Castillo Rapids quite a town has sprung up, and here the Transit Company has laids railroad track around the rapids, some two or three hundred yards, built a house and a wharf, at an expense of about eight thousand dollars. We passed the wrecks of some of the company's boats—one on the Machuca Rapids, recently lost; also, on the same are the remains of the steamers Orus and Snow, and further down, near the Colorado river, is the Miller, sunk. Their steamer Central America is ashore on the Island of Madura, in Islae Nicaragua. The company is unpopular, though they have endeavored to conciliate the government here by making the present of a sword to the incoming Director, and by putting their smallest boat at the service of the Bishop for a tour of the lake.

The feeling in behalf of the United States and Americans has greatly changed. The policy of our government under President Fills ore has been the principal cause, but the conduct of individuals also had much to do with it.

A man married a very respectable young lady of the country, and afterwards lett her, having a wife in the United States, and now the whole town is in commotion. In consequence of alleged extensive forgeries, implicating, in the first place, * * * who has hitherto enjoyed the highest reputation here—a half dozen foreigners, some Americans, others Englsh—a lot of them are now in prison, and others have left.

Ship Java, from Philadelphia, which was towed up to San Francisco leaking, after being ashore, had been at anchor on the bar 24 hours, detained by fog. and got under way on 1st, is charge of a pilot, with a light breeze from the NW. The ship was becalmed in the passage, and drifted with the tide on Mile Rock, striking the bow and breaking a number of timbers; then swung on a reef. where she remained six hours, unshipping the rudder and starting the stern post. At high water the ship floated, and was auchored fit twenty fathoms, with three feet water in the hold. Capt Munron went to the city for assistance, and during his absence both the pumps were worked by the crew and by men promptly furnished by the captain of the U.S. revenue cutter in the harbor. On Capt M's return to the ship with the steamtug he found the water had increased to seven feet; shipped the chain and took the ship in tow, but parted all the hawsers and was compelled to anchor again in 70 fathoms wa er, and return to the city for a new hawser. The water continued to increase, and when the ship reached the wharf there was ten feet in the hold. A steam pump was put on hoard and the ship kept froe. The cargo has been discharged, a portion of it in a damaged condition. The ship is so muck injured that she will doubtless be condeaned.
